

Sound Engineering – Section A

Marcello Bonello

6.3A DGD

Name and Surname: Marcello Bonello

Game Title / Working Title: QuestForCastle (Dissertation Prototype)

Target Engine (Unity or Unreal): Unity6 Engine

Target Platform (macOS / Windows): Windows

Brief description of the game:

(genre, setting, mechanics, how the player progresses)

The game is a basic 2D top-down environment with two different biomes, forest and desert. It was created as a prototype to demonstrate procedural quest generation via player profiles, one of the game mechanics is that it records your actions and generates a quest based on that. The Player can explore or use combat to fight two different enemies. Player progression is simply playing the generated quests.

Adaptive Music States — *list at least two contrasting states. For each, indicate the musical genre/feel, its intended tempo range, and when it is triggered.*

State	Genre / Feel	Tempo range	Trigger / gameplay context
State 1	Calm nature ambient	60–80 BPM	Forest Biome Area
State 2	Middle Eastern Ambient	70–90 BPM	Desert Biome Area
State 3	Medieval fantasy drum and bass	160 – 174 BPM	Combat

Game Action SFX — *list at least six in-game sound effects, describe each, and state which gameplay event triggers it.*

#	SFX name	Description	In-game trigger
1	Grass Footsteps	Soft footstep on grass/leaves	Player walks in forest biome
2	Sand Footsteps	Dry muffled footstep on sand	Player walks in desert biome
3	Item Pickup	Small magical/collect sound	Player collects an item
4	Enemy Agro Alert	Short tension sound	Enemy detects player or combat starts
5	Enemy die	Impact or creature sound	Enemy is hit or defeated
6	Inventory Selection	wooden click	Player selects something form inventory

References — *list any third-party samples, libraries, plug-ins or tutorials used, in a consistent citation style:*

YouTube searches: desert music, desert vibe music, forest music etc...

ChatGPT: used for melody ideas especially for the Arabic vibe for the desert, stuff like scales and modes.
